In production lines, it is very common that industrial equipment is installed in individual lines, and in some cases, several types of industrial equipment are installed in each line. In such a production line, as shown in FIG. 1, a plurality of lines, such as L.sub.1, L.sub.2,... are provided, and each line includes a distribution box for distributing a flow of materials, such as instructions and parts, to a plurality of operating lines. In FIG. 1, the distribution box is designated at 1, and the individual operating lines are represented by L.sub.1, L.sub.2,... Omitting the details of the individual lines, the flow of materials in each line is distributed into a plurality of operating lines in the distribution box. The distribution box 1 includes a box body 2 which is horizontally disposed. The box body 2 has a box-body body 3 which is horizontally disposed. The box body 3 defines a flow path 4 in which the flow of materials is distributed. Therefore, the box body 3 has an opening in the upper portion thereof, to permit passage of the flow of materials into the box body 3. An indexing member 5 is driven by a motor or the like (not shown) to advance/recede above the box body 3 in order to selectively open/close the opening in the box body 3. A pair of power supply cables 6 and 7 extend from the distribution box 1 to operate the industrial equipment in the individual lines, as indicated by L.sub.1, L.sub.2,... As will be described in greater detail later, the power supply cables 6 and 7 respectively operate a switch valve provided in the distribution box 1 and the indexing member 5. In the distribution box 1, there are provided a plurality of electrical contacts, each of which corresponds to one of a plurality of operation portions. More specifically, as shown in FIG. 2, the electrical contacts 8, 9 50b96ab0b6

I am using this plug-in to draw a diagram from a grid of cells (as defined by the input). For a single cell it works fine, but how do I modify the javascript to allow for multiple cells? As soon as I modify it to allow for multiple cells, the script no longer works. My current code (in in an external file) is: $(document).ready(function(){ //Cell definition var cellDef = { "width": 20, "height": 20, "id": "cell-0", "row": "cell-0-row", "col": "cell-0-col", "colgroup": "cell-0-colgroup" } //Cell array var cell_array = []; $(".grid").each(function() { var $this = $(this); cell_array.push({ "row": $this
