Is it a tool or a IDE (Integrated Development Environment)? Ok, it is a tool! A perfect name for it I would say. It compiles a Delphi (T-type) EXE with a LOT of options and decorations. I would put it into the IDE (IDE=integrated development environment) category, but I don't think it is. It doesn't appear to be a standalone IDE, but it has some IDE goodies. It is a standalone executable program - but no window appears when you double click it. It doesn't appear to be a compiler, either. When I open it, it seems to create a brand new project in the IDE or it opens an existing project. I think the latter would qualify as a compiler. A few of the IDE enhancements are features of the VCL (Virtual ComDlop components). The compiler seems to compile a Delphi (T type) program for the TARGET CPU. If you have a Delphi 1.0 IDE or RAD Studio, the compiler appears to open the project file and compile the program for the target CPU. The executable is a Delphi EXE (or something). It has some interesting settings and options that are pretty difficult to decipher. Some of the options I tried were: 1. ".The project is in Delphi 1.0 mode." - I tried this and it changed the source file extension to ".dpr" (for Delphi 1.0, I think). I removed the extension, and it successfully compiled and converted the project to Delphi 1.0 format. 2. ".Ok, it is a tool! A perfect name for it I would say. It compiles a Delphi (T-type) EXE with a LOT of options and decorations. I would put it into the IDE (IDE=integrated development environment) category, but I don't think it is." It looks like it has a lot of IDE features built in (although I didn't find a menu that said that it had a menu). 3. I am not sure I understand this one. ".The menu of the VCL components in Delphi Seattle 95 may be different from in Delphi 1.0. I am using Win 7 32 bit on a dual-boot PC, but I tried this option on XP as well." It's hard to know what this means. 4. ".The compiler and linker from VCL. I guess I don't have these installed on my system. " I tried this, and 82157476af
